

The real VIP Setup website.

For Mustafa Hanif, Founder, VIP Setup · September 2026

You've seen the demo. This proposal covers what the real VIP Setup website includes, and how we get there in 3 to 4 weeks. Demo: vip-setup-demo.vercel.app

WHY A WEBSITE, WHY NOW

VIP Setup already has what most restaurants pay agencies to invent: a real signature ("HMMM."), a loyal late-night crowd and food that photographs well.

Karachi customers find food on Instagram and Google Maps. A fast website with its own ordering turns that attention into orders: one link that shows the menu and takes the order, with every order landing in your own order portal. No delivery-app commission on those orders.

WHAT YOU SAW VS. WHAT YOU GET

Feature	Demo	Full version
Menu with photos and prices	Yes	Yes, edited by you
Online ordering	Cart only	Full checkout, delivery or pickup
Order portal	Not in demo	Live orders: accept, prepare, deliver
Owner dashboard	Sold-out only	Prices, photos, deals, hours, sold-out
Order and visitor stats	Sample numbers	Real numbers
Login	Demo PIN	Secure login for you and staff
Web address	vercel.app link	Your own domain, e.g. vipsetup.pk
Google search and Maps	Basic	Full setup and hours sync

EVERYTHING INCLUDED

Website

- Menu, about, founder, location
- Photos optimised for mobile
- Hours with today highlighted
- Works on every device

Owner dashboard

- Edit prices, photos and text
- One-tap sold out
- Deals and combos
- Hours and holiday closures

Online ordering

- Cart, quantities and add-ons
- Delivery or pickup checkout
- Live order status for customers
- Sold-out items blocked

Growth

- Google search and Maps
- Rich previews when shared
- Stats: top items, busy hours
- Instagram and review links

Order portal

- Live orders with a sound alert
- Accept, prepare, deliver, done
- Order history and customers
- Staff logins: counter, kitchen

Built-in AI

Smart features that save your staff time and help sell more, working quietly in the background.

- **AI order assistant**

A chat on the website that answers "what is spicy?" or "are you open?" in English or Roman Urdu, and helps customers build their order.

- **Weekly sales insights**

A plain-language summary in your portal: best sellers, slow items, busy hours and which deal to run next.

- **Smart suggestions**

Suggests fries, drinks or sauces based on what is in the cart, so the average order goes up.

- **Review replies**

Drafts polite replies to Google reviews for you to approve in one tap.

TIMELINE · 3 TO 4 WEEKS

Week 1

Final menu, prices and photos. Design sign-off.

From you: Menu, prices, photos, logo files

Week 2

Website and ordering built on your real menu.

From you: Quick review on your phone

Week 3

Order portal, dashboard, AI features, testing.

From you: Try the portal, feedback

Week 4

Domain, Google setup, launch, walkthrough.

From you: Domain and Google access

WHAT I NEED FROM YOU

- ☐ Full menu with current prices and add-ons
- ☐ Photos (we can use your Instagram)
- ☐ Logo files and brand colours
- ☐ Access to Google Business profile and Instagram
- ☐ Who on your staff will handle orders (portal logins)
- ☐ One contact person for quick approvals

OPTIONAL ADD-ONS · EXTRA CHARGES

- Online payments (JazzCash, Easypaisa, cards)
- Urdu version of the site
- Loyalty / repeat-customer deals
- Kitchen ticket / receipt printing

Quoted separately if you want them.

AFTER LAUNCH · ONGOING CARE

- Hosting, domain renewal and security
- Small updates to text, prices and photos
- Backups and uptime checks
- Direct support when you need it

Pricing is shared once you approve the scope.

NOT INCLUDED

- Food photography shoots
- Paid ads and boosting posts
- Third-party fees (payment gateways, delivery apps)

QUICK ANSWERS

Do I pay commission on orders?

No. Orders come straight into your own order portal.

Who owns the site?

You do: your domain, your content, your customers.

Can the AI give wrong answers?

It only answers from your menu, prices and hours, and hands anything else to your staff.

Is customer data safe?

Yes. Secure logins, encrypted connections and regular backups.

Can I change prices myself?

Yes, from the dashboard on your phone, any time.

Do my staff need technical skills?

No. If they can use WhatsApp, they can use the portal. I train them at launch.

What happens during a rush?

Every order lands in the portal with a sound alert, so nothing gets missed.

What if I want changes later?

Small updates are part of ongoing care. Bigger features are quoted separately.

NEXT STEPS

1 Approve the scope

2 Agree pricing and start date

3 Kick-off: live in 3 to 4 weeks

Ready for your **HMMM?**
